INTRODUCTION

Speaking is an action of conveying information or expressing thoughts and feelings in spoken languages based on the Oxford Dictionary of Current English as cited in Lakhsmi (2018). Speaking is the most important skill in daily life especially speak English as an international language. In globalization era, people speak with other that come from different country. Every person need to communicate through speaking to express their ideas, knowledge, experiences and feelings to other people in formal or formal situation. Therefore,
people need to be able to convey and speak with other around the world.

Sepahvand as cited in Zuhriyah (2017) argues that there are some reasons to put speaking as the first aim study such as personal satisfaction from being able to speak and reaching other interests and career goals. Speaking is one of four important skill in language learning. There are four aspects of language skills that must be mastered by students in language learning. The four aspects are listening, speaking, reading and writing. These four skills must be taught in a balanced manner so that the aim of learning English is higher education; the department of English education can be achieved properly. The general way to communicate or tell something to each other is speaking. Speaking is useful for students in learning process in the class to build their confidence. When speaking in front of their it is, still not smooth. Especially students from third semester upwards and high-level students should be able to master speaking. Therefore, many students who have difficulty when speaking English in front of classmates. So that students need to learn more how to speak in front of many people.

According to writer, speaking for intermediate subject could increase students speaking skill. This is based on the writer got from students. The writer got information from students who have studied when at third semester. The writer feel that speaking for intermediate subject is very useful to support students speaking skill because speaking for intermediate subject push students to do practice task to speak in front of other people and speak with new people, new environment and new challenge. Students do not only learn about theory but they also doing many practices of what has been learned in class to support their speaking skill.

Intermediate student have a deeper understanding of more specific or concrete topics than beginners do, but there is still much work to be done before they can express feelings and understand thoughts that are more complex. At the intermediate level there have been major advances in English proficiency and may consider working in a English-speaking environment. However, like any other learning process, practice is very important for intermediate students who want to improve their speaking skill. The goal as an intermediate student is to involve English in everyday life, especially focusing on topics of interest or in the field of work that will aspire to.

The researcher thinks, based on the above explanation, that it is important to know the Students’ Perception towards the Effectiveness of Speaking for Intermediate Subject to Support their Speaking Skill.

RESEARCH METHOD

The design that used in this research is descriptive qualitative research. The researcher research about the effectiveness of speaking for intermediate subject to support
students speaking skill. The location of this research at Muhammadiyah University of Makassar, Sultan Alauddin Street, Makassar, South Sulawesi. The research subject of this research were 20 students from class A of third semester Muhammadiyah University of Makassar's Department of English Education.

The instrument that used in this research were observation and interview. According Gorman & Clayton as cited in Baker L. M. (2006) define observation studies as those that “involve the systematic recording of observable phenomena or behavior in a natural setting”. The observation that used is field notes to gain information from the third semester students in the English Department at Makassar Muhammadiyah University. Field notes describe as accurately and as comprehensively as possible the data that analyze to provide the description and understanding of the research setting and participants. According Fraenkel, Wallen & Hyun as cited in Dahlia (2018) interview is useful to check accuracy and to verify or refute the data, which is gained from observation. The interview is necessary for collecting data in this study. It aims to give the information for the researcher to collect the data from the students’ perception towards the effectiveness of speaking for intermediate subject to support their speaking skill. The kind of interview that used in this study is unstructured interview. This interview explore and probe participants’ responses to gather in dept-data about their experiences, feelings and opinions in freely.

The techniques that used to collect the data in an interview, the researcher used (1). the researcher made a whatsapp group, (2.) the researcher sent the interview questions, (3). the students sent their record of interview answer, (4) the researcher listened to the students' records, (5). the researcher made an audio recording of the students in the form of words, (6). The researcher specifies the understanding of the students about the effectiveness of speaking for intermediate subject to support their speaking skill depending on the interview recording of the students. To analyze the data that collected the researcher used the technique observe and interview (1). the researcher asked permission to the study program office of English Department Education University Muhammadiyah of Makassar, (2). the researcher asked permission to the lecture of speaking for intermediate subject, (3.) the researcher observed the class as an example of this studied from an online program, (4) as a sample of this research, the researcher interviewed the students through whatsapp.
